

Roland FR-3x List of Sets & User Programs by Richard Noel

Web: www.noelaccordion.com

Email: BakersfieldAccordion@gmail.com

I offer a collection of 4 User Sets and a Bank of 10 User Programs, described below, that are designed to facilitate the playing of a variety of styles on the Roland FR-3x virtual accordion. To order, just email me at the email address above, and whenever you are ready to make the purchase I will send you an invoice through Paypal. You can pay from your own Paypal account or with a credit card. I will immediately send all of the programming, plus instructions, as email attachments. You only need to download the files and transfer the 3x files to a flash drive for importing to the 3x. Feel free to ask whatever questions you have before and after the purchase.

The price of the programming is \$100. Included in this price is whatever advice you need to install and use the programming. If you eventually sell your 3x, please either restore the unit to factory defaults or let the buyer know that my programming should not be distributed freely.

Please see my web site at www.noelaccordion.com for demonstrations and tutorials for the FR-3x.

These sets and user programs have been created from the ground up rather than transferred from another v-accordion. The 3x speakers and other features are sufficiently different from other v-accordions that the programming needs to be tailored to the 3x, and that is what I have done.

USER SETS

- | | | |
|---------|----------------|---|
| 301.ST3 | JAZZY | Intended for standards and jazz tunes. Includes vibes, twin trumpets, flute, two organ settings, harmonica and jazz scat voices. |
| 302.ST3 | COUNTRY | Intended for country, cajun, zydeco, and other styles, and features banjo in the chord and treble, three horns (trombone, "wailing" trumpet, muted trumpet) and violin. |
| 303.ST3 | ITALIAN | Schmaltzy Italian with accordion, strings, guitar, mandolin, and pan flute. Play the classic Italian accordion sounds. Tarantella, waltzes, etc |
| 304.ST3 | EURO | Useful for French and German, in particular, with Tuba bass, violin, strings, and more. |

USER PROGRAM BANKS

A User Program Bank contains 10 User Programs. Each of the 10 User Programs is a preset that allows you to quickly and accurately access combinations of sounds drawn from the sets.

- 501.UP3 **All-Purpose Bank**
These 10 programs, with the All-Purpose Bank, allow you to select, at a touch of a button, master or musette accordion, with accordion, bowed bass, or "string"bass, sax with string bass, horns with string bass, or acoustic guitar with picked bass.
I provide these User Programs in part to allow you to better understand and appreciate how they work. I have additional user programs available, upon request, but ideally you will soon be creating your own bank of 10 user programs. Or, you may find these 10 user programs to be entirely sufficient for your needs.
